

(54) METHOD FOR PROVIDING E-MAIL INFORMATION BY SHORT MESSAGE SERVICE
AND COMPUTER READABLE MEDIUM HAVING STORED THEREON COMPUTER
5 EXECUTABLE INSTRUCTION FOR PERFORMING THE METHOD

Abstract

The present invention related to a method for providing e-mail information by
10 short message service and computer readable medium having stored thereon computer
executable instruction for performing the method. The present invention comprises (a)
receiving a user's environment configuration for an item which is converting e-mail
information to short message via cable/wireless terminal by an e-mail notification
system from user terminal of short message service connected to user's environment
15 configuration information database; (b) generating text as text for short message service
based on conversion item configured by the user; (c) sending the generated text to SMS
user's mobile terminal using wireless communication service network by the e-mail
notification system. According to the present invention, the user can select and receive
contents of item he/she want to receive only among the contents of received e-mail, and
20 can configure the length of the item.
